Portfolio

CORE COMPETENCIES

- » Business Analysis || As-Is & To-Be Analysis
- » Product Consulting || Business Solutions Consultation
- » Requirement Gathering & Elicitation || Requirement Engineering
- » User Story Writing & Mapping || Gap Analysis, Risk Assessment, Digital Journey Design, Workflow Optimization & Wireframing
- » API Analysis & Integration (REST APIs)
- » SDLC & Release Management
- » Project Management, Governance & Delivery Excellence
- » Technical & Functional Documentations (BRD & FRD)
- » Change Management, Process Improvement, Transformations & Automations
- » API Testing & Troubleshooting
- » User & User Acceptance Testing
- » Incident Management & RCA
- » Agile/ Scrum Methodologies
- » Impediments Management
- » Client & Stakeholder Engagement

TECHNICAL SKILLS

- » **API Tools:** Postman, REST API Workflows
- » **Data Tools:** SQL, Power BI, Advanced Excel
- » **Project Tools:** Azure DevOps, JIRA, Trello, Mantis, Open Project
- » **Documentation:** FRD, BRD, Use Cases, User Stories
- » **Testing:** Manual Testing, UAT, Integration Testing
- » **Design:** UI Wireframing (basic)
- » **Systems:** Windows OS, HR/Payroll Integrations
- » **Methodologies:** Agile, Scrum, SDLC

PROFILE SUMMARY

- » Strategic & delivery-focused **Business Analyst** and **Project Manager** with **4+ years** of experience in the IT/software domain, spanning end-to-end business analysis, requirement engineering and full project delivery across enterprise and public-sector programs.
- » Well-rounded across both **product-based** and **service-based** (client delivery) environments with hands-on strength in As-Is/To-Be analysis, BRD/FRD, user stories, prototyping, and end-to-end project governance (WBS, sprint planning, stakeholder management).
- » Currently leading a government (public sector) digital transformation program for SITA (**State Information Technology Agency**), **South Africa**. Driving onsite requirement gathering, solution design and Agile delivery of an enterprise billing application, while coordinating a cross-functional team.
- » Skilled in facilitating Scrum ceremonies (stand-ups, sprint planning, reviews, retrospectives, backlog grooming) using **Azure DevOps/JIRA**, removing impediments and keeping internal & external stakeholders aligned on timelines and status.
- » Proven impact on achieved a 30% improvement in new-hire onboarding (**recognized in ANR Software's monthly newsletter**) and cut support tickets by 50% through a Partner Self-Service Portal; recognized for delivering scalable digital solutions that improve efficiency and user experience.

WORK EXPERIENCE

Mar'26 to Present: IN2IT Technology, Noida, India

Since March 2026: Business Analyst || Project Manager

Client: SITA (State Information Technology Agency), South Africa. Government / Public Sector, Telecommunications & Networking

Leading the business analysis and delivery of a Billing Application for SITA, the ICT agency of the South African government. The application lets SITA capture customer details and raise monthly bills to its clients for the services SITA provides. Managing a cross-functional team of 16 to 18 members across Development, QA and Design.

Onsite Requirement Gathering & Elicitation (Johannesburg, South Africa)

- » Travelled onsite to **Johannesburg, South Africa** for 3 months to run requirement gathering and elicitation directly at the client site, working face to face with SITA stakeholders, their business and technical teams and business analysts to understand the current process and the target system.
- » Prepared the requirement gathering approach including session plans, stakeholder specific questionnaires and workshop presentations, and requested the supporting artifacts needed to validate findings.
- » Carried out As-Is analysis from stakeholder discussions and the shared artifacts, and defined the To-Be process accordingly. Tracked each session for coverage, blockers and open items, and kept the right stakeholders informed so everyone stayed aligned on status and timelines.

Documentation & Solution Design

- » Prepared the Business Requirement Document (BRD) and Functional Requirement Document (FRD), defining the business logic, technical detail and workflows for the To-Be process.
- » Built interactive prototypes to give stakeholders a visual view of the end product before development, so feedback and changes could be accepted at the design stage instead of late in the build.
- » Wrote module wise user stories with clearly defined functional and non-functional requirements, validations, error handling and acceptance criteria.

Project Planning & Delivery Governance

- » Developed a Work Breakdown Structure (WBS) to define sequencing delivery module by module (Customer, Product Catalogue, Change Request, Contracts and the final Billing module and sub modules) and mapped how data flows from the first step to final billing.
- » Structured and prioritized the backlog by module so developers could start the build in a planned sprint sequence. Ran weekly status calls and demos with external stakeholders to share progress and delivery status.

EDUCATION

- » **2019: B.Tech. (Mechanical Engineering)** from Mitrc, Alwar.

CERTIFICATIONS

- » **2025: Certified Business Analysis Professional (CBAP®)**, Simplilearn.
- » **2025: Professional Scrum Master I**, Scrum.org.
- » **2025: Certification of Capability in Business Analysis (CCBA®)**, Simplilearn.
- » **2025: Complete Guide to Power BI for Data Analysts** by Microsoft Press, LinkedIn.
- » **2025, SQL (Basic) Certificate**, HackerRank.
- » **Project Management Professional (PMP) Certification** In Progress

Agile Facilitation & Team Enablement

- » Facilitated the Scrum ceremonies including backlog grooming, daily scrum, sprint review and retrospective for a team of 16 to 18 across Development, QA and Design.
- » Cleared development and testing roadblocks by resolving doubts and clarifications on time, keeping delivery continuous and reducing sprint spill over. Addressed the root cause of spill overs so the same concern did not come up again in the next sprint.
- » Supported the QA team in preparing test cases and scenarios, and kept internal and external stakeholders updated on project timelines and status.

Jun'22 to Feb'26: ANR Software Pvt. Ltd., Noida, India

Since 2023: Business Analyst || Associate Software Engineer

2022: Professional Services

HR & Payroll Integration Leadership

- » Led end-to-end integrations for Employee IN, Employee OUT, Payroll OUT, and Employee Updates using REST APIs, streamlining hiring, data updates, and payroll workflows.
- » Delivered seamless integration solutions for third-party payroll partners such as ADP, Proliant, Paycor, Paylocity & Paymaster, enhancing automation and operational accuracy.
- » Enabled multi-channel revenue growth by supporting partner deployments for major enterprise clients including Taco Bell, Little Caesars, McDonald's, Jack in the Box & Golden Chick.

API Design, Documentation & Workflow Optimization

- » Created & maintained comprehensive Functional & Business Requirement Documents (FRD/BRD) that defined integration specifications, business logic, and workflow requirements.
- » Built end-to-end API workflow diagrams and impact assessments to support development, testing, and deployment teams.
- » Delivered high-quality analysis reports including issue logs, troubleshooting documentation, and integration-readiness assessments within Agile/Scrum sprints.

Incident Management & API Stability Enhancement

- » Led Incident Resolution & Root Cause Analysis (RCA) for all integration-related issues, ensuring rapid recovery, minimal downtime, and improved SLA adherence.
- » Proposed & implemented technical fixes to stabilize API performance & prevent recurring issues.
- » Coordinated closely with third-party partners to validate fixes, perform regression testing, and ensure smooth, error-free deployments.

Agile/Scrum Delivery Support

- » Actively supported Agile execution by organizing and facilitating Scrum ceremonies, including Daily Stand-ups, Sprint Planning, Sprint Reviews, and Retrospectives.
- » Ensured sprint clarity and delivery alignment by coordinating across Product, Engineering, QA, and Partner Teams.
- » Strengthened team collaboration & sprint velocity through continuous tracking, backlog refinement support & proactive risk removal.

PROJECTS MANAGED

Project: SITA Project

Company: IN2IT Technology, Noida, India

Project Overview & Achievements:

- » **Overview:** Led the analysis and delivery of an enterprise Billing Application for SITA, the ICT agency of the South African government. It lets SITA onboard customer details and generate monthly bills to its clients for the services provided. This is a public sector program in the telecommunications and networking domain.
- » **Onsite Requirement Engineering:** Spent 3 months onsite in Johannesburg running stakeholder workshops, As-Is analysis and To-Be definition, backed by session plans, questionnaires and validated business artifacts.
- » **Documentation & Prototyping:** Prepared BRD and FRD and interactive prototypes, getting stakeholder agreement and change acceptance before development began.
- » **Modular Delivery:** Split the solution into a WBS covering Customer, Product Catalogue, Change Request, Contracts and Billing modules, with a clear data flow and a prioritized, sprint ready backlog.
- » **Team & Governance:** Managed a cross-functional team of 16 to 18 (Development, QA, Design), facilitated the Scrum ceremonies, removed delivery blockers and gave weekly status and demos to internal and external stakeholders.

Project: Partner Self-Service Portal

Company: ANR Software Pvt. Ltd., Noida, India

Project Overview & Achievements:

- » **Portal Design & Development:** Built an intuitive portal for third-party partners to monitor and manage integrations efficiently.

- » **Partner Dashboard:** Delivered graphical insights on live stores integrated with brands such as Little Caesars, Pizza Hut & McDonald's over 7/30-day periods, with detailed store information including name, address, city & go-live date.
- » **Resource Centre Functionality:** Enabled video uploads, document signing, and sharing of essential updates, improving partner engagement and accessibility.
- » **Impact:** Reduced support ticket queries by 50% through enhanced self-service capabilities and streamlined information access.

Project: Employee IN Integration via AC

Company: ANR Software Pvt. Ltd – Noida, India

Project Overview & Achievements:

- » **Process Optimization:** Streamlined the Employee IN Integration process to onboard employees in Altametrics Enterprise Office using REST APIs.
- » **Efficiency Improvement:** Eliminated internal processing layers, allowing direct ingestion of partner data into the Altametrics application via Any Connector service.
- » **Partner-Configurable Architecture:** Built a flexible, secure processing framework supporting partner-specific requirements, including encrypted SSN handling for select clients, generic 9-digit SSN processing for others & rotational API key management, enabling customization without impacting core platform stability.
- » **Impact:** Reduced onboarding time for new employees by 30%, improving operational efficiency and accelerating HR processes.

PERSONAL DETAILS

Date of Birth: 22nd February 1998
